Google Apps for Education (GAFE) is an Internet-based resource that utilizes web access and cloud storage. St. Ann's Academy (SAA) can provide students with a district-managed Google Apps for Education account. This provides students with a powerful collection of online collaboration and productivity tools, as well as unlimited online file storage space to be used for educational purposes. Each student will have their own secure login and password to access their account.

In order for student to use GAFE, SAA needs to provide Google with student's names, school and grade levels, and for clarity, no other personal information. SAA is required to obtain the consent of students and their custodial parents before providing this personal information as required by the British Columbia School Act and Freedom of Information and Protection of Privacy Act. In accordance with these Acts, students and custodial parents may provide consent or decline to consent (in which case the student will not be able to use GAFE), and may provide a further written response.

It is important to be aware that GAFE is an online service that is hosted outside British Columbia and possibly Canada. Only Student names, school, and grade levels will be disclosed to GAFE who hosts this service and will store the GAFE account information on secured servers located outside of Canada. While stored outside the country, information in your child's GAFE account may be subject to the laws of foreign jurisdictions including, in the United States, the USA Patriot Act, Privacy legislation requires that we inform you of this and obtain your consent to this arrangement.
